Trailhead (Double Star Ranger) ↗

PROFESSIONAL SUMMARY

Strategic Senior Integration Architect and Technical Lead with 5.5+ years of dedicated enterprise experience architecting, developing, and deploying **100+ mission-critical production APIs** across CloudHub 2.0, hybrid runtimes, and multi-cloud environments. Dual-credentialed authority holding **Salesforce Certified MuleSoft Platform Architect** alongside **Workato Certified Technical Architect (Enterprise Orchestration & Agentic)** and **Workato Technical Developer** certifications. Proven leader in agentic AI architectures, engineering scalable autonomous workflows using **Model Context Protocol (MCP)**, Salesforce Agentforce, and Workato Genie. Recognized track record managing high-throughput ecosystems (5M+ monthly transactions, 99.99% uptime), directing agile engineering squads, and enforcing zero-defect CI/CD release automation.

CORE ARCHITECTURAL COMPETENCIES

- **Integration Architecture:** 3-tier API-led connectivity, Scatter-Gather parallelization, Batch Jobs, ObjectStore v2, and resilient ESB design.
- **Enterprise iPaaS & Cloud:** CloudHub 2.0 (Private Spaces), Workato Enterprise Orchestration, On-Prem/RTF, and AWS (S3, SQS, DynamoDB).
- **Advanced Data Transformation:** Complex DataWeave 2.0 scripting (streaming payloads, flat files, recursion, custom modules, JSON/XML/CSV).
- **API Strategy & Security:** Full-lifecycle API management, RAML 1.0 & OAS 3.0, API AutoDiscovery, OAuth 2.0, mTLS, JWT, and rate limiting policies.
- **DevOps & Automation:** Zero-downtime CI/CD pipelines (GitHub Actions, Azure DevOps, Jenkins, Maven parent POMs), and >85% MUnit test gates.
- **Agentic AI & Development:** MuleSoft Agent Fabric, MCP Servers, Windsurf (AI IDE), Dev Agent, MuleVibes, and Salesforce Agentforce.

PROFESSIONAL EXPERIENCE

Tech Mahindra | Senior MuleSoft Engineer & Lead

July 2025 – Present

KEY PROJECTS & ARCHITECTURAL INITIATIVES:

- Architected and delivered an enterprise-grade 3-tier API-led connectivity ecosystem for a major Energy & Utility client, managing **100+ production APIs** handling 5M+ monthly transactions with 99.99% availability.
- Spearheaded zero-downtime migration of legacy APIs to **CloudHub 2.0 Private Spaces**, leveraging Anypoint MQ for asynchronous buffering and total system decoupling.
- Designed enterprise security patterns, custom policy enforcement, and reusable common logging/error-handling modules across 15+ microservices to ensure centralized auditability.
- Optimized complex **DataWeave 2.0** transformation algorithms for large billing and meter datasets, slashing end-to-end payload processing latency by 35%.
- Implemented Scatter-Gather parallel aggregation patterns for composite customer profile lookups, reducing downstream API response times by 60%.
- Developed a custom Maven plugin and reusable parent POM framework enforcing automated SonarQube quality gates and mandatory 90% MUnit code coverage across all squads.
- Integrated AWS Secrets Manager and KMS for automated zero-trust credential rotation across 50+ backend microservices and databases.

TECHNICAL LEADERSHIP & STRATEGY:

- Mentored and coached junior & mid-level developers in RAML contract authoring, thread-safe ObjectStore management, and production debugging best practices.
- Led architectural review boards (ARB) and sprint code reviews, eliminating technical debt and aligning microservices with enterprise integration governance.
- Collaborated directly with client CTOs, Enterprise Architects, and product stakeholders to translate complex business roadmaps into crisp Non-Functional Requirements (NFRs) and API contracts.
- Pioneered adoption of AI-assisted engineering practices, integrating MuleSoft Agent Fabric, MCP Servers, Dev Agent workflows, and Salesforce Agentforce tools.
- Architected GraphQL-based unified data aggregation layers supporting heterogeneous data stores (PostgreSQL, Oracle, IBM DB2, and AWS DynamoDB).

PROFESSIONAL EXPERIENCE (CONTINUED)

NTT DATA (Apisero Inc.) | Digital Engineering Senior Engineer — May 2021 – July 2025

- Engineered, tested, and maintained scalable Mule 4.x microservices across Retail, Banking, and Financial Services clients adhering to C4E guidelines.
- Integrated AWS Cloud infrastructure (S3 buckets, DynamoDB NoSQL tables, SQS queues, and Secrets Manager) into event-driven Mule ESB flows.
- Automated enterprise CI/CD release pipelines using Azure DevOps, GitHub Actions, and Maven, cutting manual deployment overhead by 40% and ensuring zero deployment rollbacks.
- Governed end-to-end API lifecycle from Anypoint Design Center contract authoring to runtime traffic governance and SLA monitoring via Anypoint API Manager, Splunk, and CloudWatch.
- Authored exhaustive MUnit test suites with automated mocking, parameterization, and failure path assertions achieving >92% test coverage.
- Conducted performance benchmarking, thread pool tuning, and heap memory analysis on Mule runtimes to resolve thread starvation and memory leaks during peak volume windows.
- Collaborated with business analysts and quality engineering squads in agile sprints to deliver zero-defect releases on accelerated bi-weekly cadences.

TECHNICAL SKILLS & TOOLING

Integration & iPaaS:	MuleSoft Anypoint Platform, Workato Enterprise Orchestration, Mule ESB 4.x, CloudHub 2.0 (Private Spaces), CloudHub 1.0, Anypoint MQ, APIkit, Flex Gateway, APM.
Cloud, Event & DevOps:	AWS (S3, Secrets Manager, DynamoDB, SQS, SNS, KMS), Apache Kafka, Azure DevOps Pipelines, GitHub Actions, Jenkins, Maven, Docker, Kubernetes.
Languages & Data:	DataWeave 2.0, Java 17/11, RAML 1.0, OAS 3.0, GraphQL, SQL, MySQL, Oracle, PostgreSQL, JSON, XML, X12 EDI.
Monitoring & Quality:	Splunk, Anypoint Monitoring, CloudWatch, SonarQube, MUnit, Postman, JIRA, ServiceNow, Anypoint Code Builder.
AI & Development:	MuleSoft Agent Fabric, MCP Servers, Windsurf (AI IDE), Dev Agent, MuleVibes, Salesforce Agentforce, Workato Agentic AI.

CERTIFICATIONS & EDUCATION

- **Workato Certified Technical Architect (Agentic)** ACTIVE
- **Workato Certified Technical Architect (Enterprise)** ACTIVE
- **Workato Certified Technical Developer (Dev 1)** ACTIVE
- **Salesforce Certified MuleSoft Platform Architect I** ACTIVE
- **Salesforce Certified MuleSoft Developer (L1 & L2)** ACTIVE
- **Salesforce Certified Data Cloud & AI Associate** ACTIVE
- **Salesforce Trailhead Double Star Ranger:** trailblazer.me/id/npotter3 ↗
- **Bachelor of Technology in Computer Science & Engineering** — *2015 – 2019*

AUTHORSHIP & COMMUNITY CONTRIBUTIONS

- **Creator & Author of "IntegrationMind" (https://integrationmind.netlify.app/ ↗):** Authored and published as a free community initiative to help engineers and architects globally prepare for senior integration interviews. Features an interactive 31-module enterprise blueprint covering 188+ production scenarios, NFR client discovery checklists, and performance traps.
- **Open-Source & Mentorship:** Active contributor of MuleSoft reusable connectors, parent POM archetypes, and architectural interview preparation materials on GitHub (github.com/niranjanpotter ↗).
